Portfolio

EXPERIENCE

EY

Business Consulting-Risk

Jul 2025-Present, Mumbai

Data Analyst

- Architected and deployed end-to-end tax reporting pipelines on Azure Databricks + Synapse, processing 1M+ financial records per cycle eliminating manual consolidation and enabling real-time reporting for a Big 4 client with multi-billion dollar tax exposure.
- Redesigned PySpark transformation logic on Databricks cutting pipeline job runtimes by 50% and reducing cloud compute costs annually, while improving throughput for time-sensitive regulatory reporting deadlines.
- Co-developed a RAG-powered LLM chatbot on confidential client data enabling natural language querying of KPIs and exception flags across business units, reducing analyst time spent on ad-hoc data pulls by an estimated 12 hours per week and replacing a previously manual review process. .

Matrix 3d Infocom Ltd.

Cybersecurity Intern

Jun 2024 - Aug 2024, India

IAM, Threat Detection, Compliance,RPA

- Independently conducted an end-to-end Azure security configuration audit spanning IAM, threat detection, and data compliance identifying 12 critical misconfigurations across the client environment and producing a remediation roadmap adopted by the security team.
- Mapped Azure environment against regulatory compliance frameworks (e.g. ISO 27001 / CIS Benchmarks), surfacing 470 non-compliant controls across 8 clients directly reducing client's audit risk exposure and enabling certification readiness within the engagement timeline.
- Using Power automate to develop relevant flows in the recruitment process for HR team reducing applicatant review time by upto 90%.

PROJECTS

Coding Fatalities for Military Casualties

- Tech Stack-Gensim,Pytorch,BERT
- Utilized Latent Dirichlet Allocation (LDA) to segment topics from over 2 million articles in the New York Times dataset.Perplexity score of -8.9 acheived over 2 million articles.
- Fine-tuned a BERT-based model to develop a custom Named Entity Recognition (NER) pipeline for extracting incident metadata.
- Achieved 98% precision and 94% recall on unseen test data, outperforming ChatGPT and GLiNER in military entity recognition tasks.

End to end supply chain management system

- Tech Stack-QWEN,Open-CV,VLM's
- Developed an image preprocessing and post processing pipeline to classify and subsequently process objects.
- Extracted Date of Expiry and used QWEN-VL to classify objects based on category. Established an Azure db as well as an sqllite db to track inventory.
- Used Anamoly-GPT and custom defect detection based on opencv to detect packaging defects. Developed a power-Bi dashboard connected with Azure lakeview to gain insights on data.

SUMMARY

Microsoft PL-300 and AI 102 certified data analyst and mle with knowledge of SQL databases,Power BI as well as strong experience in developing end-to-end AI solutions.Worked with Azure Synapse Analytics, Azure Data Lake, and Azure SQL Database.Proven track record in hackathons and developing real-world applications.

TECHNICAL SKILLS

Languages	Python, C/C++ ,Pyspark,SQL
ETL,Scripting	ADF , Databricks
AI/ML	NLP, PyTorch, OpenVINO, OpenCV
Tools	Git, Azure Studio, Power BI, MS-SQL,Mongo DB
Other	DSA, OS,DBMS ,System design

EDUCATION

VJTI	Mumbai, India
B.Tech in ECE	
Dec 2021 - June 2025	CGPA: 7.02
PJSC, Dadar	Mumbai, India
HSC	
May 2019 - March 2021	91.33%

ACHIEVEMENTS

- SIH WINNER 2023, 2024 (Team Lead)
- Top 50 TATA Elxsi Teliport
- JEE-M 98.8 percentile with 99 percentile in maths
- Selected for lateral entry in IIITH top 10 amongst 5000
- Software team for mars rover achieving rank of 16 globally, VISHWA (2022-23)
